

# Ratchet Tie Down Long Handle Pulldown

CODE: R0174, R0164

## Reverse Action Ratchet Strap

This long-handle ERGO-style tie down features a pull-down mechanism for easier tensioning, reducing strain on the user. Measuring 9m x 50mm with a 2500kg lashing capacity, it's built tough with industrial-grade, UV-stabilised polyester webbing and a powder-coated, low carbon steel ratchet buckle for durability and long service life. Complies with AS/NZS 4380:2001. Available with a 360mm or 500mm tail to suit different trailer heights and applications.

## Why is it different?

This ratchet strap differs from the traditional push up style ratchet strap in it's action. Rather than the operator straining their back to push up and get tension, they can easily use their body weight to pull down for tension. Moreover, this ratchet strap can achieve twice the amount of tension, twice as easily.

## Tail Lengths

The advantages of the 360mm tail is that on a tall trailer, the handle is more accessible/reachable. The 500mm tail is well-suited to a smaller truck.

## Product Specifications

Product Code	Lashing Capacity	Dimensions	Tail Length	Standards	Mechanism	End Fitting
R0174	2500kg	9m x 50mm	500mm	AS/NZS 4380:2001	Pull Down	Hook and Keeper
R0164	2500kg	9m x 50mm	360mm	AS/NZS 4380:2001	Pull Down	Hook and Keeper
