

Temp Armour Insulated Thermal Pallet Cover

Temp Armour is a tough, reusable insulated thermal pallet cover designed to **protect temperature-sensitive cargo** from unwanted hot or cold fluctuations during storage and transit. Its durable one-piece construction with velcro flaps installs in seconds and provides maximum temperature protection on loading docks and in vehicles, including when transporting frozen and chilled products in the same van. Suitable for both hot and cold loads, Temp Armour offers a cost-effective solution for maintaining more stable cargo temperatures and can be manufactured in custom sizes with optional branding.

Key Features

- Velcro Flaps for easy installation.
- Handles for easy removal.
- Colour-coded according to size for easy identification.
- Available in 3 sizes.
- Custom sizing and branding available.
- Compact, foldable design for easy storage
