

# Engineered Dunnage (E-Dunnage)

Engineered Timber Dunnage is manufactured from sustainably sourced StyraX and Eucalyptus veneers, bonded to deliver a high strength-to-weight ratio with consistent performance. Designed for steel transport, pallet support, general freight, and export packaging, it eliminates knots and random grain weaknesses found in solid timber.

The dunnage is lightweight, easy to handle, waterproof, UV stable, and available in standard 1200mm and 2400mm lengths with an integrated strapping groove for secure load restraint in 1200mm lengths. Suitable for ISPM-15 export requirements and supplied palletised for efficient transport and storage.

1200mm with strapping groove

2400mm without strapping groove

Product Code	Length	Width	Height	Material	Pack Qty	Strapping Groove
H0151	1200mm	50mm	50mm	StyraX	120	Yes
H0153	1200mm	75mm	75mm	StyraX	120	Yes
H0161	2400mm	100mm	100mm	BWP Grade Eucalyptus	50	No
