

# DuraCoil Steel Coil Tarps

The DuraCoil Steel Coil Tarp protects steel coils and other round loads during transport. It's made for flatbeds and curtain-siders and built to last on Australian roads.

## Material and Construction

The tarp is made from 610 GSM PVC-coated polyester. This material resists UV rays, mildew, and water. It stays flexible in cold weather and won't tear or fade easily.

## Secure and Durable

Welded D-rings give you more options when tying down your load. Each D-ring sits on an abrasion pad and is reinforced with double stitching. Edge grommets make fastening quick with bungees or tie-down straps.

All edges are double-stitched and reinforced for strength in tough conditions.

## Practical Design

The top half of the tarp fits the coil's shape for easy placement. The bottom flaps let chains and restraints pass through without bunching or lifting the tarp. It comes with 12 ropes (2 m x 8 mm) ready to use.

Product Code	Material	GSM	Length	Width	Height	Weight	D-Rings
H0201	PVC Polyester	610 GSM	1.8m	1.8m	1.8m	14.3kg	Welded
H0202	PVC Polyester	610 GSM	1.65m	1.35m	1.35m	10.3kg	Welded
