

STRONG ARM STRAP

CODE: TT0091

Original Curtain Puller

The V2 Strong Arm Strap is engineered for strength and safety, giving operators **maximum pulling power** without the pain. Drivers find that years of pulling tautliner curtains open can cause serious strain on their backs and shoulders. This is where the strong arm strap comes in. With its versatile S-hook design, the hook latches onto almost anything, keeping operators hands protected while allowing them to pull with their core strength instead of overstretching their arms. That means less risk of back, shoulder, and hand injuries, and more control with every pull.

Product Specifications

Product Code	Length	Width	Webbing	End Fitting	Stitching	Colour
TT0091	645mm	35mm	High-Tensile Strength Polyester	Heat-Treated, Rubber PE-Coated S Hook	30DD high-strength polyester thread	Orange

- ✓ Makes pulling tautliner curtains (turntable pins, roller doors etc.) easier and safer
- ✓ Reduces strain & injuries on shoulders, arms, hands and backs
- ✓ Boosts compliance with Manual Task Risk Assessment guidelines
- ✓ Reduce workers compensation claims and costs
- ✓ Trusted by national fleets and safety leaders
