

CONTAINER DOOR OPENING BAR

CODE: TT0072

Multi-purpose Container Door Opening Bar

The Container Door Opening Bar is designed to provide superior leverage, making container access safer, easier, and more efficient.

It can also be used as a **tire thumper** to quickly check for underinflated tires, a **fifth-wheel release hook** to reduce strain when uncoupling trailers, and a **container seal breaker** for removing plastic or metal seals without the need for additional tools. The bar also functions as a **cam pin compressor** to help align misaligned cams and a **headache rack tool** for freeing stuck latches, making it a versatile addition to any truck or yard operation.

Key Features

- Safety tool with high-pressure tolerance
- 3 layers of rust inhibitors
- Plastic vinyl handle
- Anti-corrosive to gas and oil, helps operators hands from slipping
- Quality materials, quality control, and made in the USA

Designed to fit and extend the door latch handles on side by side doors found on the following units with the safety of the driver, operator, and worker foremost in mind: Dismountable and Refrigerated Shipping Cargo Container Trailers, Semitrailer Refrigerated and Dry Freight Cargo Vans.
