

ADJUSTABLE ERGO SHORING BAR F-TRACK

CODE:TT0059

General Description

The Adjustable Ergo Shoring Bar – F-Track is designed to provide secure load restraint while **reducing operator effort and manual handling strain**. The ratchet-style lever mechanism enables controlled tensioning and positive locking, minimising the risk of strain injuries associated with conventional shoring bars. An ergonomic high-handle design allows easy operation in confined spaces and remains effective in cold environments or when used with gloves.

The bar has a wide adjustment range from **2270 mm to 2670 mm** in 3 mm increments, ensuring compatibility across varied trailer configurations. Constructed from high-quality steel, it delivers a **227 kg Working Load Limit** while maintaining a lightweight **6 kg** profile, approximately *3 kg lighter than traditional alternatives*. An internal tooth track reduces wear on the locking mechanism, supporting consistent performance and long-term durability in demanding transport applications.
