

# RATCHET STRAP THROWER

CODE:TT0115

## Description

This strap thrower, launches the strap in a straight line, eliminating annoying twists in your straps. It also reduces safety hazards, by easily placing the straps in high and hard to reach position, staying compliant with any 'boots on the ground' policy.

The arm keep the strap secure whilst throwing, ensuring the strap does not fly out of the thrower. The heavy-duty metal head construction provides greater strength and longevity than plastic strap throwers.

Product Code	Height	Extended Height	Head Width	Weight	Pole Material	Head Material
