

UNIVERSAL TARP 8000mm x 4000mm

CODE: H0251

The Universal Tarp (UniTarp) is a heavy-duty, yet light-weight poly tarp designed to protect steel, timber, and other loads during transport. Made from strong PVC-coated polyester and 680gsm, this tarp is lighter and more waterproof than canvas tarps, weighing just 27.5kg. The UniTarp measures 8000mm x 4000mm, making it the ideal size for a multitude of load types. 750mm drop each side on a 2.5m wide load.

Features

- Comes with x10 Tarp Ropes - 3.3m x 8mm ropes with splined loop
- Reinforced edges where grommets are placed.
- Abrasion-resistant padding underneath each D-ring.
- Resistant to fading, mildew, tears, and punctures.
- Maintains flexibility in cold weather.
- Comes in a zipped storage bag.

1st D-Ring Row: 350mm from Edge

2nd D-Ring Row: 850mm from Edge (500mm between rows)
