WHO ARE WE?

Tegral is a innovative Australian manufacturing company.

Born from a passion to make the Australian transport industry world-leading, we have been supporting Australian transport fleets since day one.

We make the lives of fleet and operations managers, simpler, easier and safer, by supplying effective load restraint solutions through transparent and genuine transactions.

- Decades of combined experience supplying the transport and logistics industry.
- Complete compliance with the NHVR Load Restraint Guide.
- Products tested and certified to meet relevant AS/NZS standards.
- Proven record of helping operators improve safety, efficiency, and reliability.

WHY TEGRAL?

Tegral delivers **15–20% operational cost savings** by guaranteeing **fast delivery** of equipment that **reduces loading time, reduces LTIs, and cuts admin time.**

20%

Cost Savings

Fast Delivery

Reduced LTIs

**Service that cuts
admin time**

"Tegral's dedication doesn't stop at supply — they routinely go the extra mile, often quite literally. Whether it's hand-delivering equipment late into the afternoon or fast-tracking urgent items, they ensure we're never left waiting. This kind of personal service is rare and highly valued."

- Team Global Express Fleet Manager

OPERATORS WE SUPPORT

CUSTOM BRANDED LOAD ANGLES

1. Reduces equipment loss.
2. Increases brand awareness and traceability.
3. Available on both 470mm and 1050mm angles.

Fast turnaround: 2-3 days

No logo set up fee.
MOQ on custom logo: 250

TRANSPORT TOOLS

DRUM STRAP BAR

Suits 205L & 44 gallon drums
Plastic and Steel Drumes

CODE: TT0012

DRUM CLIP

Strong Durable Nylon Material
1 Drum Clips Used Per 2 Drums
Strap Guide on each piece
Reusable
Sold Individually
CODE: TT0013

STRAP WINDER BIT

50mm Strap Winder Attachment
Suits most straps
Fits into standard drill
8mm shaft or hex fit
Wind up your straps in seconds
CODE: TT0021

SIDE WINDER

50mm Strap Winder Attachment
Suits most straps
Designed & made by Tegral
CODE: TT0022

STRAP WINDER DRILL KIT

Makita Drill Kit
1x Battery, Charger, Drill & Carry Case
2x Strap Winder Bits

CODE: TT0023

50mm STRAP KEEPER

Fits 50mm wide straps
Keeps straps tidy in toolbox and in transit
Designed & made by Tegral
CODE: TT0024

HAND HELD STRAP WINDER

Strong light weight plastics and can roll
up to 12m of webbing
Rolls up the webbing quickly and
neatly

CODE: TT0025

PALLET PULLER - 4.5m CHAIN

Hook with 4.5m chain and grab hook
2T Pulling Capacity
Contact for custom lengths
CODE: TT0033

WINCH BAR MINI - 420mm

420mm Length
Lashing capacity of 3000kg
Complies with AS/NZS 4380:2001

CODE: TT0061

WINCH BAR - 900mm

900mm Length
Complies with AS/NZS 4380:2001
knurled grip and a double loop design
to keep the bar aligned with the winch
handle

CODE: TT0062

BENT WINCH BAR - 550mm

550mm Bent Winch Bar
Moulded handle
Angled at the end for ease of operation
Chrome plated for durability

CODE: TT0063

TRANSKING TIGHTWINDER BI-FOLD WINCH HANDLE

Suits Transking Tightwinder Winch
No winch bar kick back
Saves operators back, shoulders &
hands
CODE: TT0064

GOOD-N-TIGHT RATCHET TIGHTENER

Provides 3X mechanical advantage
Molded to suit most 50mm, 75mm and 100mm Ratchets
Allows users to properly tension ratchets with less stress on the body
CODE: TT0071

CONTAINER DOOR OPENING BAR

Reduces strain and effort when opening container doors, helping prevent injuries

CODE: TT0072

PALLET ANGLE TRIDENT - STANDARD

1.1m to 2.05m

Grade S Shackle (Dee Type, Blue Screw Pin)

Tegral's blue screw pin dee shackles are most commonly used for lifting applications, providing connections to chain, wire rope and other rated fittings within the marine, agricultural, mining and engineering industries.

- Conforms to AS274 manufactured from Grade S material in dee configuration with screw pin hot dipped and galvanized.
- Marked with working load limit in tonnes, quality grade, batch numbered, nominal size in millimetres and supplier identification. Test certificates are available upon request. Also available in black colour in all sizes upon request.
- Proof tested to be 2x working load limit, with a minimum break force of 6x working load limit.
- Suitable for lifting applications.

Grade S Shackle (Bow Type, Blue Screw Pin)

Tegral's blue screw pin bow shackles are most commonly used for lifting applications, providing connections to chain, wire rope and other rated fittings within the marine, agricultural, mining and engineering industries.

- Conforms to AS271 manufactured from Grade S material in bow configuration with screw pin hot dipped and galvanized.
- Marked with working load limit in tonnes, quality grade, batch numbered, nominal size in millimetres and supplier identification.
- Proof tested to be 2x working load limit, with a minimum break force of 6x working load limit.
- Test certificates are available upon request. Also available in black colour in all sizes upon request.
- Suitable for lifting applications.

Flat Webbing Slings

Tegral's flat webbing slings are manufactured according to Australian Standard AS1353.1, fabricated using 100% high tenacity polyester yarn. Durable and specially woven, 100% polyester with standard folded eyes that incorporates eye wear padding to provide maximum protection around the eyes. Each sling is proof tested, individually serial numbered, tagged and complete with test certificates.

- Other sizes available upon request.
- Spec sheet available on the website.

Conforms to AS/NZS 4345:2001
1T Lashing Capacity

CODE: U0061

HEAVY DUTY MOVING BLANKETS 1.8m x 3.4m

Weight: 4.6 kg / 740 gsm
Fabric: Non-woven
Stitching: Zigzag stitch
Sold in bundles of 5
CODE: RM0002

THERMAL FOIL BUBBLE WRAP INSULATION 1.5m x 100m x 10mm

Reflective foil insulation effectively blocks heat transfer by reflecting 92% of light
Thermal barrier for warehouse storage, logistics, and freight transport
CODE: G0621

TEMP ARMOUR INSULATED THERMAL PALLET COVER 1.2m

Reusable & Durable, built for long-term use.
Reliable Insulation with aluminium foil.
Custom Sizes Available
CODE: G0601

TEMP ARMOUR INSULATED THERMAL PALLET COVER 1.5m

Reusable & Durable, built for long-term use.
Reliable Insulation with aluminium foil.
Custom Sizes Available
CODE: G0602

TEMP ARMOUR INSULATED THERMAL PALLET COVER 1.8m

Reusable & Durable, built for long-term use.
Reliable Insulation with aluminium foil.
Custom Sizes Available
CODE: G0603

EURO THERMAL PALLET COVER 1.2m

Reusable & Durable, built for long-term use.
Reliable Insulation with aluminium foil.
Custom Sizes Available
CODE: G0670

LDPE PALLET BAGS 1900mm x 25um

100 bags per roll
1200x1200x1900mm 25 Micron
Supplied on a convenient perforated roll, enabling quick and easy use
CODE: G0641

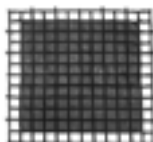

TRAILER TARPS

Designed to protect steel, timber, or other loads during transport.
Made from strong and durable 650gsm PVC-coated polyester.
3 Rows of Eyelets on sides, and 2 rows front & back
CODE: H0300

HEAVY DUTY CARGO NET 2.4m x 2.4m

Storage & Carry Case
x4 Tie Down Straps
x4 Carabiners
x1 Cargo Net
CODE: S2004

Tempwise Thermal Barriers (Freezer Mats)

Tegral's Freezer Mats, also known as Insulated barriers, or Chiller Boards are essential for creating multi-temp zones in trailers, protecting temperature-sensitive goods and reducing spoilage. Our custom-made freezer mats are the best way to allow for multi-temp zones within your trailer e.g. frozen, refrigerated, and ambient.

- **Australian Made:** Custom-built locally with quality craftsmanship.
- **Durable & Waterproof:** Reinforced PVC skin and heavy-duty base for long-lasting performance.
- **Lightweight & Easy to Handle:** Foam core with optional webbing or hook-and-loop handles.
- **Excellent Insulation:** Closed-cell foam core for superior thermal performance and energy efficiency.
- **Custom Colours:** Available in blue, pink, red, or your preferred colour for bulk orders.
- **Bolt-Free Design:** Airtight seal without steel nuts/bolts—no heat transfer or cargo damage.
- **Free Branding:** Add your logo, fleet/trailer/reg number at no extra cost.
- **Highly Adaptable:** Options for vents, fan mounts, Velcro systems, angle cuts, strapping, and GPS pockets.
- **Repairable:** Built for cost-effective maintenance and reduced environmental impact.

STEEL TRANSPORT

COIL RACK - 610

610mm (measured between uprights)
Made according to BlueScope's requirements
Vulcanised Rubber
Hot-dipped Galvanised
CODE: H0021

COIL RACK - 710

710mm (measured between uprights)
Made according to BlueScope's requirements
Vulcanised Rubber
Hot-dipped Galvanised
CODE: H0022

COIL RACK - 810

810mm (measured between uprights)
Made according to BlueScope's requirements
Vulcanised Rubber
Hot-dipped Galvanised
CODE: H0023

CHAIN RETAINER

Chain Retainer for Slit Coil
Made to the required dimensions of BlueScope
Heavy duty galvanized finish

CODE: H0031

DURACOIL STEEL COIL TARP 1.8m x 1.8m x 1.8m

Constructed from PVC-coated polyester.
Rows of welded D-rings
610 GSM

CODE: H0201

DURACOIL STEEL COIL TARP 1.35m x 1.35m x 1.65m

Constructed from PVC-coated polyester.
Rows of welded D-rings
610 GSM

CODE: H0202

TARP ROPE - 3.3m

3.3m lengths of white tarp rope
Used for tying down tarps
Splined loop
8mm Polypropylene Rope

CODE: U0001

COIL PADS

High Quality Polyurethane Coil Pad for Steel Coils
500mm wide x 82mm high x 1010mm long

CODE: H0045

TEGRAL COIL RACKS

INTERESTING FACTS ABOUT TEGRAL

Tegral operates a full manufacturing facility with CNC Machines, Welders, Lathes and Injection Moulders up to 450t capacity.

We have our own design and rapid prototyping facilities in-house, which enable us to support the transport industry.

Because the vast majority of our core product range is produced in-house in Australia, we have greater control over the manufacturing process, achieving higher-quality products and rigorous standards.

LOAD RESTRAINT SYSTEM CHECKLIST

PLANNING THE LOAD

1. Understand your load.

Know your load's characteristics.

2. Choose a suitable vehicle for your load type and size.

Check your vehicle's carrying capacity and allowable overhang/height.

3. Use a restraint system that is suitable for your load.

Choose the most suitable restraint method for your load and vehicle.

4. Position your load to maintain vehicle stability, steering and braking.

Keep the centre of gravity as low as possible; don't exceed legal limits for overhang, height and width, mass and axle mass.

5. Check your vehicle structures and restraint equipment are in good working condition and strong enough to restrain your load.

Check all vehicle and restraint equipment is rated and fully functioning, and all worn/damaged equipment is repaired or replaced.

LOADING (AND UNLOADING) THE VEHICLE

6. Make sure your load is stabilised.

Take steps to stabilise a load that is at risk of toppling over.

7. Make sure you understand and use safe work practices when loading and unloading a vehicle.

Create plans, train staff, create loading zones and communicate appropriately for the environment.

8. Make sure you use enough restraint to keep you and others safe.

Your load restraint system must meet the Performance Standards.

DRIVING ACCORDING TO THE LOAD AND DRIVING CONDITIONS

9. Allow for changes in vehicle stability, steering and braking when driving a loaded vehicle.

Be aware of the changes in your vehicle's handling, height and width.

10. Check the load and its restraint regularly during your journey.

Loads can settle and shift; lashings may need to be re-tensioned.

YOUR LOADING OBLIGATIONS

RULES ON LOAD RESTRAINT

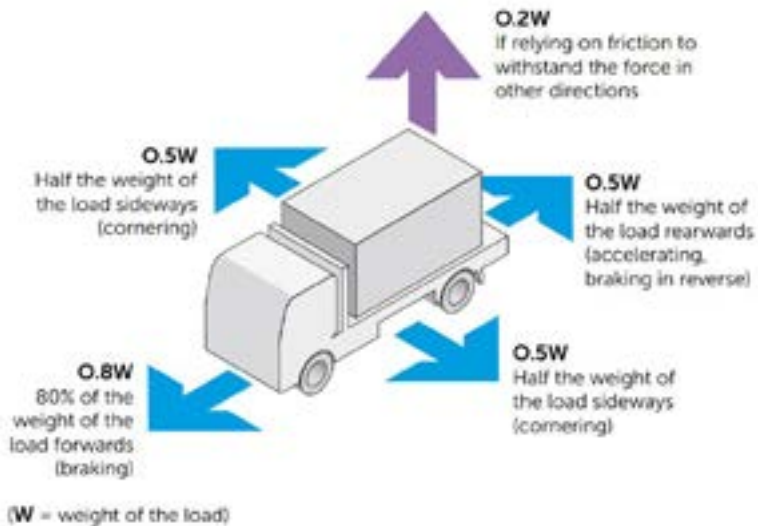

You are legally responsible for restraining your load so that:

- It does not come off your vehicle under normal driving conditions, including heavy braking and minor collisions. If it comes off, this is evidence you have breached the law.
- It does not negatively affect the stability of the vehicle, which can cause the vehicle to roll over or swerve uncontrollably, and cause an accident.
- It does not stick out of the vehicle in a way that could injure people, damage property or obstruct others' paths.

You must pick up any fallen load if it is safe to do so, or arrange for someone to retrieve it.

THE LAW SETS OUT PERFORMANCE STANDARDS FOR LOAD RESTRAINT

- The Performance Standards set out the minimum amount of force a restraint system must be able to withstand in each direction. For heavy vehicles, these forces are:

- If a load is restrained to meet these Performance Standards it will not fall off or affect the stability of the vehicle under expected driving conditions. This includes emergency braking and minor collisions.
